### Policy for Slow and Advance Learners

#### Concept:

1. Advanced learner students typically refer to those who demonstrate exceptional abilities or skills in academic subjects compared to their peers. These students often grasp concepts more quickly, exhibit higher levels of critical thinking, and may require more challenging coursework or specialized instruction to keep them engaged and stimulated in the learning process. They may excel in areas such as mathematics, language arts, science, or other specialized subjects. Providing appropriate support and resources tailored to their needs can help them reach their full potential.
2. Slow learner students typically refer to those who require more time and support to grasp academic concepts compared to their peers. They may have difficulties in understanding information, processing instructions, or retaining knowledge at the same pace as others in their age group. These students may benefit from personalized learning strategies, additional repetition, remedial instruction, and individualized support to help them overcome their challenges and achieve academic success.
3. Assessing students' learning levels involves various methods, such as examining their performance in qualifying exams, competitive entrance tests, and initial program stages like orientation. These assessments serve as indicators of their achievement upon entering the university program. Continuously evaluating their exam results, participation in extracurricular activities, and co-curricular activities throughout the program helps gauge their progress. Statistical methods like calculating central tendencies and standard deviations can establish benchmarks, categorizing students into high, average, and low levels. Monitoring changes in their achievements from one semester to the next allows for comparisons and informs appropriate interventions to support their advancement.

**Introduction:-** In classrooms, teachers encounter a variety of students with different learning abilities. Some students grasp concepts quickly, while others struggle to understand at a slower pace. It's important for teachers to recognize these differences and adapt their teaching methods accordingly. By observing students' performance, learning speed, and previous exam results, teachers can categorize them into two groups: advanced learners and slow learners. Each group requires different levels of support and attention. The purpose of assessing students' learning

levels is to identify slow learners and advanced learners in order to provide them with necessary assistance and ensure their academic improvement. Teachers conduct these assessments regularly, usually after exams or at the beginning of the semester, to tailor their teaching approach to meet the needs of all students effectively.

Every teacher should conduct class test of their subject based on syllabus covered on first unit of 25 marks and the duration of one hour to identified slow and advance learner. The slow and advance learners are identified on the following parameters.

- Students who get less than 40% marks are called Slow Learners, while those who get over 70% are called Advanced Learners.
- We make separate lists for each type of learner. Then, we use these lists to keep track of them and organize extra study sessions to help them improve.

### **Slow Learners Policy**

- We offer special classes for students who need extra help, like those who learn a bit slower or miss classes often. These classes help them get better at sports and catch up with their classmates in subjects they struggle with.
- We group students based on their learning pace and have activities to help them learn better.
- Teachers keep an eye on their progress and offer support when needed.
- For new students, we have a program to help them adjust to college life. We provide simple study materials and support services tailored to their needs.
- We also organize talks by experts to inspire them.

### **Advance Learner Policy**

- We have a support system in place for students who excel in their studies.
- We encourage them to participate in activities like debates, group discussions, and competitions to enhance their skills beyond the classroom.
- We provide them with resources tailored to their advanced level of learning and offer personal counseling whenever they need guidance.
- We also organize guest lectures to expose them to new ideas and honor outstanding students each year with awards and certificates.
- Additionally, we provide opportunities for them to enroll in specialized courses and engage in interactive learning through technology.
